

Columbus Area Aviators

EAA Chapter 729 Newsletter
Columbus Municipal Airport (BAK)
Columbus, Indiana
March, 2018 Volume 23, Issue 3

March Meeting

The March meeting will be a presentation by Larry Bothe on some of the things he has learned over the years as both a flight instructor as well as a former Designated Pilot Examiner. His talk is titled **“Fly the Easy Way – 21 Tips and Tricks”**.

The meeting will be held at the **Atterbury-Bakalar Air Museum** on **Thursday evening March 15th at 6:30 PM.**

February Meeting

The February meeting was a presentation by Dr. Adam Clock on his flight last year to Cuba.

Adam and his wife flew their Bonanza to Cuba as part of a group of about 30 aircraft organized by the Flying Dentists Association.

His talk included information about the unique requirements for flying to Cuba as well as very interesting facts about daily life there and the many historical sites that they visited. A very enjoyable and interesting presentation for sure.

Notes from the President’s Desk

Chapter 729 Members:

In like a Lion, and out like a Lamb! Fortunately, this year March has been mostly a Lamb.....at least from a snow perspective. Fingers crossed it remains this way!

February presentation by Adam Clock on flying and travel to Cuba was a huge hit. We thank Adam for his excellent presentation and sharing of this experience! It definitely made members think of duplicating.....well, maybe not the part of jumping out of a Russian helicopter onto the beach! Thank you Adam!!

Most all know of Larry Bothe - southern Indiana FAA Designated Pilot Examiner and AirVenture-Oshkosh presenter. Larry will be presenting at March membership meeting **“Fly the Easy Way - 21 Tips and Tricks”**. In addition to being a Master CFI and retired FAA DPE, Larry has experience covering 45 years of flying (both fixed and helicopter) and ownership of 4 aircraft. His presentation and open discussion promises to hold a number of “Food for Thought” points. Join us **Thursday, March 15 2018 @ 6:30 PM at Atterbury-Bakalar Museum** for this educational evening. See you there...!!

In April, we will continue an educational/learning theme by partnering with Columbus Municipal Airport (BAK) control tower, on airport safety. A presentation by Ben Euler (Tower Chief) will be given on safety initiatives and behind the scene reasons. If you’ve attended a prior year, you understand how helpful this is to the entire aviation

community. We are blessed in numerous ways for the strong and productive controltower operations at BAK, please come and show your support, as well as that you're all about safety too!

Looking ahead, "Thunder over Louisville" is right around the corner on Saturday, April 21 and Chapter 729 Young Eagle program kicks off on Saturday, May 19.

Please watch our chapter website (www.729.eaachapter.org) for these and many more events. We are constantly updating and trying to improve the "Event Calendar" to keep our membership informed.

Safe travels,

Brad

2018 Young Eagle Events

The Young Eagle Flight events for 2018 will be held on the following Sat. mornings.

May 19th June 9th July 14th Aug. 18th

These events are a great way to introduce kids to the wonders of aviation (not to mention a good reason to go flying). To make these events a success, we will need pilots, planes, and ground crew volunteers.

Items For Sale or Needed

As long as space is available, I'll list items either wanted or for sale that are AVIATION related. If you will provide me with a brief description and contact information, I will include your items.

1966 Beech Debonair

Total Time: 3,345 hrs.
SMOH: 1,260 hrs.
IO-470-K engine (225 HP)
KX-155 with Glideslope
MK-12D with Glideslope
Northstar GPS
KR-87 ADF
AT-150 with Encoder
Standby Vacuum System
\$58,500

Contact: Steve Fushelberger
 317-407-5227
 812-379-4255

Aircraft Partnership

Piper Cherokee 140 (160 engine upgrade)
IFR Equipped
ST30 autopilot
Based at KBAK

Aviation Humor

Magneto -

1. Spanish for, "What a cool-looking magnet!"
2. Not-very-famous Italian vaudeville magician, "The Great Magneto."

Mode -

Term used by pilots in the Lafayette Escadrille during WWI to describe what they had to land in during rainy weather.

Motor -

A word used by Englishmen and student pilots when referring to an aircraft engine. (also see "Aerodrome")

Nanosecond -

Time delay built into the stall warning system.

National Airport -

Inordinately congested airport in Washington, D.C. whose Potomac River approach was used by Korean War pilots practicing to bomb the bridges at Toko-Ri.

Navigation -

The process by which a pilot finds his way from point A to point B while actually trying to get to point C.

Occupied -

An airline term for lavatory.

Oshkosh -

A town in Wisconsin that is the site of the annual Experimental Aircraft Association fly-in. It is believed to have been named after the sound that most experimental aircraft engines make.

Parasitic Drag -

A pilot who bumps a ride and complains about the service.

Pilot -

A poor, misguided soul who talks about women when he's flying and flying when he's with a woman.

Pitch -

The story you give your wife about needing an airplane to use in your business.

Pitot Tube -

On long flights, something into which the pilot can pitot.

Prop Wash -

1. Cleaning agent used by student pilots.
2. Pilots' equivalent of "hogwash."

Pylon -

All aboard!

Radar -

An extremely realistic type of video game, often found at airports. Players try to send small game-pieces, called "blips," from one side of the screen to without colliding with each other. Player with the fewest collisions wins.

Range -

Usually about 30 miles beyond the point where all fuel tanks fill with air.

Roger -

1. The most popular name in radio transmissions - followed by Dodger, Codger, Over & Out..
2. Used when you're not sure what else to say.

S-turn -

Course flown by student pilot from point A to point B.

Short-field Takeoff -

A takeoff from any field less than 10,000 feet long.

Split S -

What happens to the pants of overweight pilots (also see "Gross Weight").

Spoilers -

The Federal Aviation Administration.

Tactics -

What the instrument panel clock sounds like when it needs fixing. An improperly tuned clock goes "Tock Tick" instead of "Tick Tock".

Taildragger -

1. An old pilot after a long flight.
2. A young pilot who over-rotates a tricycle gear aircraft on takeoff or landing.

Tailwind -

Results from eating beans in the airport coffee shop; often causes oxygen deficiency in the immediate vicinity.

Trim Tab -

1. A device that can fly an airplane better than the pilot.
2. Popular diet beverage for fat pilots (also see "Gross Weight").

Useful Load -

Volumetric capacity of the aircraft, without regard to cargo weight.

Walkaround -

What you do when waiting for weather to clear.

Wilco -

Roger's brother, the nerd.

Windsock -

Well-perforated item of clothing worn inside the shoe by underpaid copilot who can't afford a replacement or a darning needle.

Wing strut -

Peculiar, ritualistic walk performed by student pilots upon getting out of low-winged trainers following first flight performed without instructor yelling at them. Usually results in instructor yelling at them.
